PREFACE

Final results from the 1971 Census of Population and Housing are being released in a series of 14 bulletins covering single and cross-classified characteristics of population and dwellings.

Bulletin 8 showed 1971 Census details for each Commonwealth electoral division according to the 1968 boundaries for seats in the House of Representatives.

A redistribution of electoral divisions in Western Australia and the Australian Capital Territory was made in April 1974. This supplement to Bulletin 8 shows 1971 Census characteristics of population and dwellings for these electoral divisions according to the 1974 boundaries.

EXPLANATORY NOTES

GENERAL

Bulletin 8 showed characteristics of population and dwellings in each Commonwealth electoral division at the Census of 30 June 1971. The divisions were those determined by the 1968 electoral boundaries, which applied at the time of the Census.

By proclamation on 19 April 1974, under the *Commonwealth Electoral Act 1918-1973*, the nine electoral divisions in Western Australia were redistributed to become 10 divisions, the additional division being named Tangney.

The single electoral division in the Australian Capital Territory was divided into two divisions by the *Australian Capital Territory Representation (House of Representatives) Act 1974*, assented to on 10 April 1974. These were named Canberra and Fraser.

This supplement shows 1971 Census characteristics of population and dwellings for each electoral division in Western Australia and the Australian Capital Territory as determined by the 1974 redistribution. For detailed explanatory notes and a copy of the Census Schedule, please refer to Bulletin 8.

DEFINITIONS

Labour force and employed and unemployed

The questions used in the Census to determine labour force participation were as follows:

- (a) Did this person have a full or part-time job, or business or farm of any kind last week?
- (b) Did this person do any work at all last week for payment or profit?
- (c) Was this person temporarily laid off by his employer without pay for the WHOLE of last week?
- (d) Did this person look for work last week?

The labour force comprises employed and unemployed persons and is defined as those persons 15 years of age and over who answered 'Yes' to any of the above questions. Thus the labour force comprises those persons who worked, those who had a job from which they were temporarily absent, those who were temporarily laid off without pay for the whole of the reference week *and* those who did not work, did not have a job and were actively looking for work.

Persons helping but not receiving wages or salary who usually worked less than 15 hours a week are excluded from the labour force. Bonded trainees (including trainee teachers) and cadets engaged in full-time study at educational institutions are also excluded, even though such institutions are conducted by their employer.

The unemployed persons are those who did not work during the reference week *and* either looked for work (having no job) or were temporarily laid off from a job.

Dwellings

An occupied dwelling is defined as any habitation occupied on Census night by a household and may comprise the whole or only a part of a building. A household is a person or group of persons living and eating together. The number of occupied dwellings and the number of households are therefore identical.

An unoccupied dwelling is defined as a structure built specifically for private living purposes and which is habitable, though unoccupied at the time of the Census. Non-private dwellings are those dwellings which provide group accommodation such as hotels, motels, hostels and staff quarters and institutions such as hospitals, nursing homes, prisons, boarding schools etc., and which were occupied on Census night. For such dwellings no details of the characteristics other than class of dwelling were sought.

Persons classified as 'campers out' include those living temporarily in tents, caravans or houseboats or who were camped out on Census night. Persons who on Census night were on board ships in Australian ports or travelling between two Australian ports, or who were enumerated on long distance trains, buses or aircraft are classed as 'migratory'. Such persons are regarded as not living in dwellings for census purposes and consequently details in respect of these persons are only shown in summary Tables 1 and 21 where a notional dwelling has been allocated to each person or group of persons camped out or migratory.

Note that tents, huts, caravans and houseboats used to provide *permanent* or *semi-permanent* accommodation are classified as dwellings.

Usual resident of a dwelling

A 'usual' resident of a dwelling is any person who on Census night had lived in the dwelling for the last six months, or proposed spending six months or more during 1971 in the dwelling, or any person who was in the dwelling on Census night and had no usual place of residence.

British nationals

British nationality includes all persons who, by virtue of the *Nationality and Citizenship Act* 1948-1966, are deemed to be British subjects.

NOTES TO TABLES

Table 1 : Summary

British nationals aged 18 years or more — *see* Definitions

Visitors to Australia — Persons born outside Australia who stated that they were visiting as opposed to settling in Australia

Usual residents of dwellings — The number of persons who stated that they were usual residents of the dwelling in which they were enumerated (*see* notes for Table 4)

Occupied private dwellings — *see* Definitions

Unoccupied private dwellings — *see* Definitions

Occupied non-private dwellings — *see* Definitions

Tables 2, 6 and 17 : Ages

These three tables cover ages of the total population, the Australian-born population and the labour force. Ages of the overseas-born population and persons not in the labour force can be derived by comparison with the appropriate tables.

Table 4 : Usual residence

At the Census persons were asked whether they were usual residents of the dwelling in which they were enumerated. If not, they were asked in which State they usually resided (or overseas). The table will give an indication of the number of visitors enumerated in the area.

Table 5 : 1966 Residence

Persons 5 years of age and over who were usual residents of the dwelling in which they were enumerated were asked for their address at 30 June 1966. The category 'other and not stated' includes those usual residents aged 5 years or more who were overseas in June 1966 and those who had moved since June 1966 but did not state their 1966 place of residence.

NOTE: The divisions referred to in the table on 1966 residence represent *statistical* divisions not *electoral* divisions. Maps showing statistical division boundaries are listed on page 63.

Table 8 : Usual major activity

Persons were asked two independent questions, one on their usual major activity and another on whether they worked or looked for work during the week prior to the Census. Thus persons whose usual major activity is other than 'working' may in the reference week have been in the labour force and vice versa. The table shows the extent of such cases.

Table 10 : Birthplace of parents

This table is restricted to persons aged 0-24 years, born in Australia, to show the impact of persons born of migrant parents. The groupings used are as follows:

Australia	
U.K., Ireland	– England, Scotland, Wales, Northern Ireland, Republic of Ireland and Ireland (undefined)
South Europe	– Italy, Greece, Cyprus and Malta
N.W. Europe	– Germany and Netherlands
East Europe	– Albania, Bulgaria, Czechoslovakia, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Ukraine, U.S.S.R. (n.e.i.), Yugoslavia
Asia	– Asia excluding Cyprus, Lebanon, Syria and Israel
Other	– All countries not listed above.

Table 13 : Occupation of employed persons

This table shows the employed population 15 years of age and over classified into 73 minor groups of the full classification. The titles of these minor groups are shown in the Appendix.

Occupation is defined as the type of work performed by an employed person and should not be confused with the type of productive activity, business or service carried out by the establishment in which a person works, e.g. a carpenter employed by a steel-making establishment would have the occupation of 'carpenter' and industry 'steel manufacture'.

Table 14 : Industry of employed persons

This table shows employed persons aged 15 years and over (see Definitions) classified by industry groups.

Industry is defined as the branch of productive activity, business or service carried out by the establishment in which a person is employed.

NOTE: Industry data recorded at the 1971 Census of Population and Housing were classified, for the first time in a population census, according to the Preliminary Edition of the Australian Standard Industrial Classification.

Table 15 : Government and non-government employment

Commonwealth government covers all Commonwealth government departments; statutory authorities, State and local government are included in 'other government.'

Table 18 : Level of qualification

The levels of qualifications held, or being studied, were determined as follows:

Trade : formal recognition of competency in a skilled manual occupation which is usually obtained through an apprenticeship and satisfactory progress in part-time studies concurrently with practical training (e.g. plumber, fitter, compositor, carpenter, hairdresser).

Technician : a level which requires theoretical knowledge, as well as practical skills, e.g. wool classing or nursing. Certificates issued by technical colleges following periods of 4 or 5 years part-time study after passing intermediate or final secondary school examinations are classified as 'technician'.

Non-degree tertiary : a level relating to qualifications obtained following substantial advanced study beyond matriculation conferred by institutions and professional associations, e.g. Associate of Australian Society of Accountants, Diploma in Business Studies, Teaching Certificate, Diploma of Engineering.

Bachelor degree : usually conferred by a university following a period of at least 3 years full-time study or equivalent part-time study and includes post-graduate diplomas.

Higher degree : conferred by a university in recognition of substantial studies beyond the bachelor level.

Not classified by level : the figures relate to qualifications which could not be classified to any of the aforementioned levels. Most of these relate to short specialised courses in such fields as typewriting and shorthand, farm book-keeping, dressmaking, automotive maintenance etc.

The headings to the columns of the table are not applicable to the following three categories of level of qualification.

Age 0—14 years : the level of qualification obtained or being studied was not asked of persons in this age group. The figures shown relate to all persons aged 0—14 years.

Studying/Qualified : this category is a balancing item only. The figures under the heading 'Qual. Obtained' covers persons who were studying for but had not obtained a qualification. The figures under the heading 'Studying for Qual.' covers persons who had obtained a qualification and were not studying. A person both qualified and studying would be included at the appropriate level in each section of the tables.

Other : the figures relate to persons who were neither qualified nor studying for a qualification.

Table 19 : Level of schooling

At the 1966 Census persons were asked to state the highest level of schooling *completed*. For the 1971 Census the question was redesigned to obtain a measure of the highest level *attended*.

Persons no longer at school were requested to mark the grade in the current local system corresponding to the highest grade which they had attended.

Education systems differ between the Australian States and the question on schooling was varied appropriately in Schedules used in different States.

The following table was used to assign grades (or forms) in each State or Territory to an approximately comparable level.

<i>State or Territory</i>	<i>Grade or form reported</i>									
N.S.W., VIC., A.C.T., TAS.	1 & 2	3	4	5	6	1	2	3	4	5 & 6
QLD	1,2 & 3	4	5	6	7	8	9	10	11	12
S.A., N.T.	1,2 & 3	4	5	6	7	1	2	3	4	5
W.A.	1,2 & 3	4	5	6	7	1	2	3	4	5 & 6
Level assigned	1	2	3	4	5	6	7	8	9	10
	Primary school					Secondary school				

The category 'Not Student, Schooling Not Stated' relates to the number of adults who did not answer the Census question on level of schooling. However, persons aged 5—15 years who failed to answer the question were allocated a level based on the modal level for that age in each State using the latest available information on the distribution of the school population by age and level.

Table 20 : Occupational status of the population

The relationship between the terms 'occupational status', 'employment status' and 'labour force status' as used in 1971 Census publications is illustrated by the following classifications:

<i>Occupational status</i>	<i>Employment status</i>	<i>Labour force status</i>
1. Employer 2. Self-employed 3. Employee 4. Helper	Employed	In the labour force
5. Looking for first job 6. Other unemployed	Unemployed	
7. Not in the labour force	Not in the labour force	Not in the labour force

Table 21 : Summary of dwellings

See Definitions.

Table 22 : Occupied dwellings by class

In this table details are given for each of the 9 classes of private dwellings identified at the Census. 'Non-private dwellings' are dwellings which provide group accommodation such as hotels, motels, hospitals, boarding schools etc.

In later tables 'house' includes the first 5 categories, 'S.C. Flat' is category 6 and 'other private' includes categories 7-9.

Table 24 : Household class

A 'household' is defined as a 'person or group of persons living and eating together'. Within a household there can be more than one distinct family unit and these units are identified using blood and marriage relationships as indicated by the reply to the question on the Census Schedule 'What is this person's relationship to the head of the household' and by other information such as name, sex, age and marital status.

Separate family units within a household are classified into two types:

Primary Family Units (PFU's) are those family units where the head of the family is also the head of the household. Such families may consist of only one person.

Secondary Family Units (SFU's) are all other family units within the household. Such families are defined as having at least two persons of immediate family relationship (husband, wife, son, daughter).

The classification of households consists of various combinations of PFU's, SFU's and other persons of either too distant a relationship to be included in a family or unrelated persons resident in the dwelling on Census night. The classification is shown below :

<i>Household classification</i>	<i>Components of household</i>
1	Single family household
2	A PFU <i>and</i> related SFU(s) <i>and/or</i> other distant relatives of the PFU
3	A PFU of one person <i>and</i> non-related SFU(s) <i>and/or</i> non-related persons
4	A PFU of more than one person <i>and</i> non-related SFU(s) <i>and/or</i> non-related persons
5	A PFU <i>and</i> related SFU(s) <i>and/or</i> other distant relatives of the PFU <i>and</i> non-related SFU(s) <i>and/or</i> non-related persons

Table 31 : Number of rooms by class of dwelling

For Census purposes 'rooms' excludes bathrooms, toilets, pantries, laundries, storerooms, halls, and rooms used only for business purposes, but includes permanently enclosed sleep-outs. Combined purpose rooms such as a living-dining room are counted as one room.

Table 32 : Number of bedrooms by class of dwelling

'Bedrooms' includes permanently enclosed sleep-outs. A one-room apartment or bed-sitting room is counted as having no bedroom.

Table 35 : Bathroom and kitchen facilities by class of dwelling

This table shows occupied private dwellings classified by class of dwelling and whether the dwelling had a bathroom and/or kitchen for the *sole use* of the occupying household or whether the occupying household *shared* these facilities with another household. The abbreviation N/S means "not stated".

Table 36 : Number of vehicles by class of dwelling

Householders were asked to exclude motor cycles, scooters and tractors and to include company vehicles kept at home.

Table 37 : Gas and electricity facilities and television by class of dwelling

The number of dwellings shown against 'television' is the number where the question on possession of a television set was answered in the affirmative and excludes cases where the question was not answered.
